

## How to Invest with Ethereum and Bitcoin

In this tutorial we go through every step for you to invest Ethereum and Bitcoin on UTRUST ICO, from wallet creation to sending the payment. We advise you to read our terms and conditions regarding the ICO in order for you to be informed with such investment.

At this stage **every ETH/BTC wallet is accepted**, including your account/wallet from your favorite exchanger.

You will only need an ethereum wallet (not from an exchanger) for retrieving the tokens once the ICO closes. Once it closes we will release a guide on how can you do it.

When the pre-ICO starts you deposit your investment to the address of your favorite crypto (either BTC or ETH).

At this point you can make the transfer right from your private wallet, exchanger or web based wallet.

ETH Transfers: **If you can change your Gas limits, please put the Gwei at 50 and Gas limit 200000 so that your transfer will be as fast as possible.**

BTC Transfers: **Confirmations are slow on the btc blockchain so wait for a couple of hours to get at least 3 confirmations for the transfer to be validated.**
